PERSONAL PROJECTS

Online Cab Booking System (11/2022 - 02/2023)
- The Online Cab Booking System is a Java-based application with a MySQL backend, designed to streamline the process of booking and managing cab services online. As a software developer, I led the development and implementation of this project, which aimed to provide a user-friendly and efficient platform for customers to book cabs easily.

Online Food Website (01/2021 - 05/2021)
- The Online Food Website is a web development project I worked on from January 2021 to May 2021. As the lead developer, I designed and developed the landing page of the website using HTML, CSS, and JavaScript. The project aimed to create an enticing and user-friendly platform for customers to explore and order food from various restaurants.

E-commerce Website (08/2021 - 11/2021)
- During January 2022 to February 2022, I led the development of an E-commerce Website that specialized in selling clothes and shoes. This project involved the creation of a fully responsive website with multiple pages, including user account management and product details.

SKILLS

`Java` `Html` `Css` `JavaScript` `MySQL` `Python` `c++` `Object-Oriented Programming (OOP)`
